

STRENGTH

WALL, shelves, brackets, hooks and baskets

storeWALL HeavyDuty™ WALL strength
110 pounds at
8 inches from the wall

storeWALL Standard™ WALL strength
88 pounds at
8 inches from the wall

Wall weight capacity is dependent on secure fastening to a suitable surface.

The weights illustrated are a general guide. Load capacity for both wall and accessories increase when the load is closer to the wall and decrease when the load is farther away. Make sure load capacity is suitable to your application.

Bracket and CustomCut™ shelf strength
100 pounds per bracket

Weight loading for 10" and 15" shelf is determined by the number of brackets used.
2 brackets hold 200 pounds;
3 brackets hold 300 pounds.
Two brackets can hold 20 gallons of paint or 4 - 50 pound bags of dog food..

5" CustomCut™ shelf strength
10 pounds per foot

1 foot shelf holds 10 pounds
3 foot shelf holds 30 pounds
Ten pounds is equal to 13 cans of soda on one lineal foot of shelf.

CamLok™ Hook strength
75 pounds per hook

Shown is the HeavyDuty Universal Hook. A short hook, like the Universal Hook, holds even more weight.
Seventy five pounds is equal to 15 sturdy garden shovels or 3 heavy mountain bikes.

CamLok™ Basket strength
100 pounds per basket

One hundred pounds is equal to 235 soft balls.
