walls that work

GET INSPIRED

EXPAND & ORGANIZE YOUR SPACE

Expand and organize your space with wall-mounted storage solutions from StoreWALL. With superior materials and construction, our products are built to last. Plus, you won't find a system that's easier to install. Available in multiple finishes, there's a look for every space.

*Trust the things you value to StoreWALL, the **best value** in storage solutions.*

storeWALL™ CORE FEATURES

HEAVY DUTY THERMOPLASTIC

For durability, strength and consistency.

100% RECYCLABLE

Class 3 recyclable.

SEAMLESS, FASTENER-FREE INSTALLATION

Create any size wall with InstallStrips and Tongue and Groove design.

MODULAR DESIGN

Panel sizes allow for ease of design and installation.

INDUSTRIAL STRENGTH

For maximum load holding and rugged performance.

ACCESSORIES

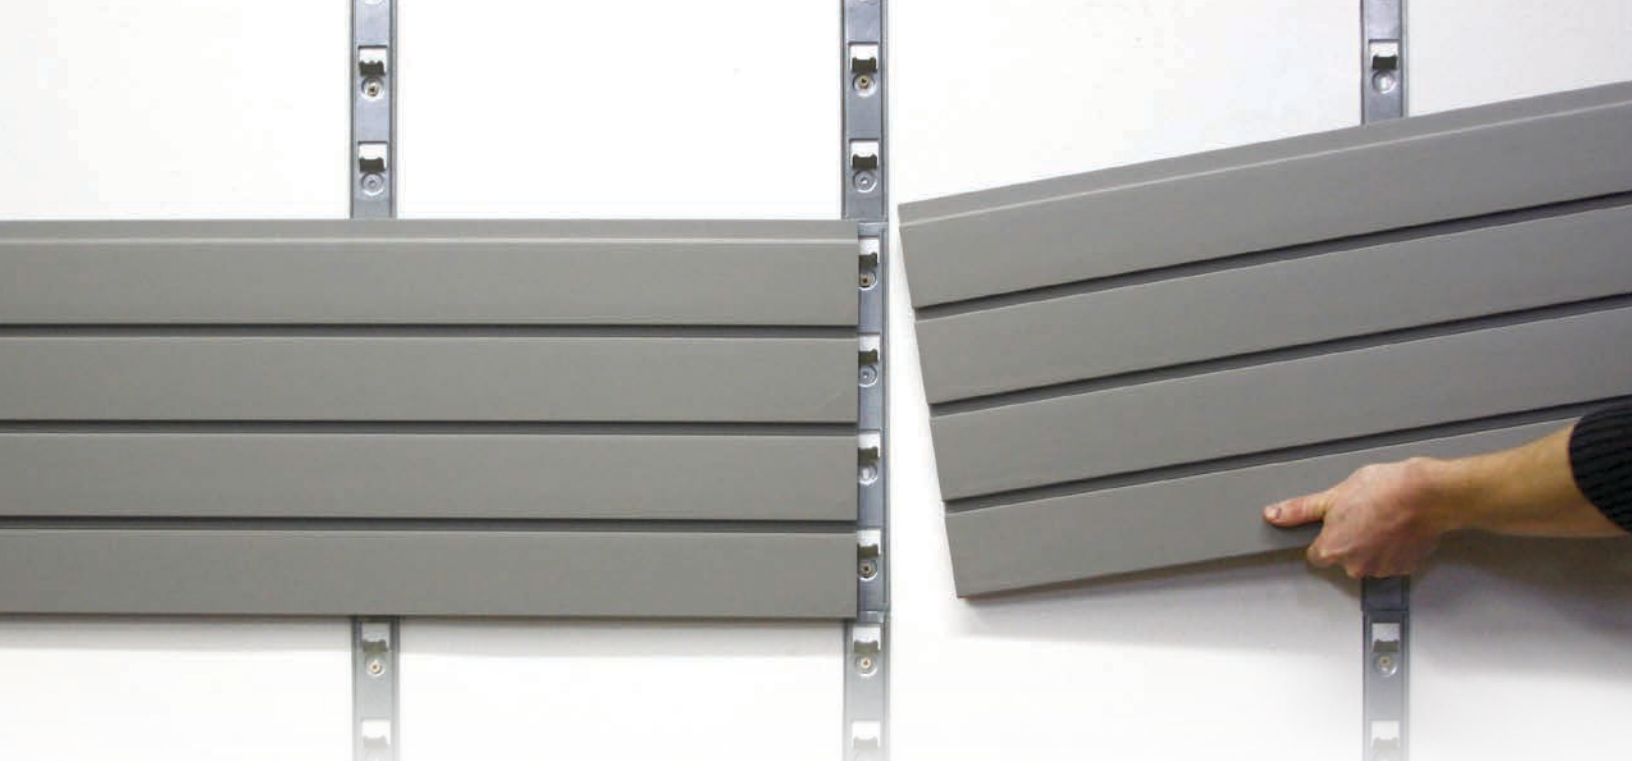

Compatible with conventional slatwall accessories

SOLID CORE

100% Waterproof, mold, mildew and stain resistant. Multiple colours/wood grains, indoor or outside application.

INSTALLS ON ANY SURFACE

Accepts InstallStrips for installation ease on wood or metal studs and concrete.

BEAUTIFULLY SIMPLIFIED INSTALLATION

STANDARD DUTY *store***WALL**TM

Standard Duty StoreWALL is incredibly strong, rugged and waterproof: ideal for the most demanding applications. It easily installs on any surface; wood studs, drywall, concrete and metal studs using our innovative InstallStrip hidden fastener system, allowing for fast and easy installation.

INSTALLATION MADE SIMPLE, CLEAN & TIDY

INSTALL STRIP

Our innovative InstallStrip is a smart mounting solution for Standard Duty StoreWALL.

Made from high-strength rolled steel and cleverly designed, it allows for easy installation on nearly any surface, including: Metal or wood studs, drywall, concrete and block.

TRIM SELECTION

StoreWALL's trim installs easily with conventional fasteners and helps keep your garage looking clean and finished.

Trim options include: flat trim for butt joints and inside corners, small "L" trim for wall end caps, and large "LT" trim for outside wall corners.

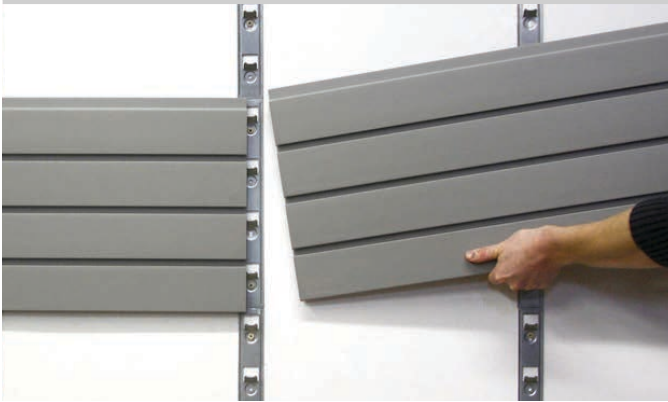

INVISIBLE FASTENERS

The standard screws that are used to secure our Standard Duty StoreWALL securely to its surface are available in all of the same colours as our StoreWALL product, making them almost invisible when installed.

Screws are zinc plated and rust resistant.

INSTALL OPTIONS

OPTION 1: INSTALL STRIPS

For the highest load capacity and a flawless finish with no visible screw heads, use install strips to mount slatwall. Secure the strips to wall studs, then hang the panels onto the strips. This method ensures a sturdy, professional-looking installation.

Weight Capacity: 250 lb/ft²*

Product(s) Required: StoreWALL Standard Duty (SD) Panel, Standard-Duty Installation Strips, and Screws.

*Weight capacities are estimates based on 16" stud centers.

OPTION 2: SCREW & GLUE

This method offers an excellent balance of installation speed and load capacity while delivering a clean finish. Apply adhesive to the back of the slatwall, position it on the wall, and secure it to the studs with our color-matched screws.

Weight Capacity: ~150 lb/ft²*

Product(s) Required: StoreWALL Standard Duty (SD) Panel, Glue (Recommend Lepage's PL-400 Joist Glue), Screws.

*Weight capacities are estimates based on 16" stud centers.

OPTION 3: SCREWS ONLY

This method is the fastest option but offers a the lowest load capacity. Position the slatwall on the wall, then secure it to the studs with color-matched screws. When matched properly, the finish can be just as clean as the Screw & Glue method.

Weight Capacity: 85 lb/ft²*

Product(s) Required: StoreWALL Standard Duty (SD) Panel and Screws.

*Weight capacities are estimates based on 16" stud centers.

HAVE QUESTIONS OR NEED MORE INFO? WE'RE HAPPY TO HELP! 403.519.0074

INSTALL TIPS

01. PANEL LOCATION PLANNING

Avoid going tight against your ceiling. Leave at least ½"-1" space from the top of your panel to the ceiling.

02. LOCATE STUDS

Use a stud finder to locate stud locations. If you want to double check stud locations, drive a screw into where the area identified by your stud finder. If the screw tightens, remove it and continue installation. If the screw spins and doesn't tighten, recheck your wall with your stud finder.

Helpful info: Most homes are built using 16" stud centers, but some newer homes are constructed using 24" stud centers.

03. STARTING PANEL INSTALLATION

Start from the bottom. A laser level is useful but not required. If installing by yourself, consider using a 12" install strip to use as an extra set of hands. Hang the strip toward the outside of the panel and hang the panel on it (Image 3A). Level the panel and screw it into place. Do not over tighten screws. Aim for the installed head to be flush with the panel (Image 3B).

Image 3A

Image 3B

04. TIP FOR LARGER WALLS

If your wall is wider than 8', you can assemble your wall using an offset pattern to avoid long unsightly seams. We'll use a 16' wall as an example (Image 4A):

- Bottom row, 8' and 8'
- 2nd Row, Cut one panel in half and install with the cut end to the outside edge of your coverage area. Install 4' then 8' then 4 feet.
- Row 3, same as bottom row, and then repeat as necessary.

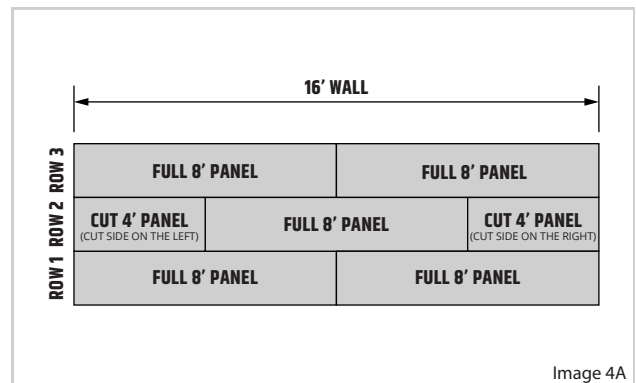

Image 4A

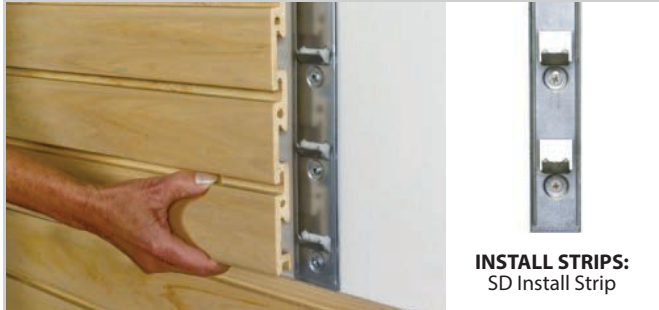

05. DEALING WITH CUTOUTS:

Keep a sample piece of panel to assist with measuring for electrical cut outs etc.

- Place your sample on top of the panel, and directly beside the edge of the outlet or cut out that you require.
- Measure from the end of the panel to the cut out, mark the wall on both sides. Repeat for top and bottom.
- Remove the panel and place it face down on a clean surface. Mark measurements on the back of the panel.
- Drill the inside corners of the cutout with a 3/8" drill bit. Use a jigsaw to remove the remaining cutout.

Helpful info: If cutting an electrical cut out, use a plastic Box Extender so your installation will meet code requirements.

*NOTE: Our Graphite Steel and Silver finishes are a unique metallic surface treatment, very similar to that found on an automobile. The substructure is solid PVC as are all StoreWALL wall panels. Please note the metallic effect is only on the surface and if gouged deep enough, just like an automobile, the gouge may show. Thus we encourage reasonable care and handling be exercised when choosing our Graphite Steel and/or Silver wall panels.

CAMLOK FEATURES

EXCLUSIVE CAMLOK

Keeps accessories locked in place.

HEAVYDUTY BACKPLATE

Engineered tough for the most demanding applications.

STW 10 POWDER COAT FINISH

Extra heavy coating to resist dings and protect against rust.

INDUSTRIAL GRADE STEEL

Engineered strong to hold your most valuable equipment.

RUBBERIZED GRIP

For extra grip and prevents damage to your items.

STOREWALL'S 10-YEAR WARRANTY

Performance guaranteed to last 10 years...

...No questions asked!

THE CAMLOK

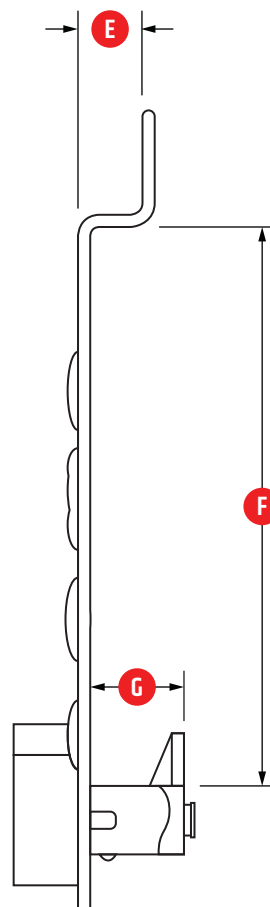

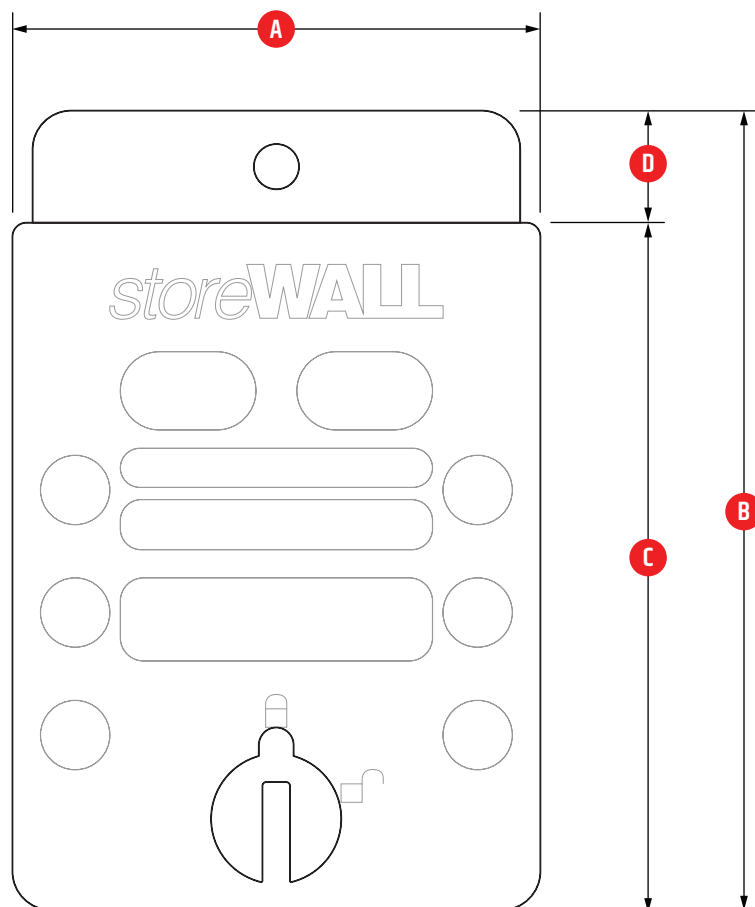

StoreWALL's accessories feature their exclusive CamLok system to lock your accessories securely into the panels. This chrome plated, solid metal CamLok gives you the advantage of safety, security, and protection. A simple twist holds the accessory securely in place; another turn and the accessory can be easily moved to a different location on the panel. All StoreWALL accessories are built to perform with superior construction and the finest materials: industrial grade steel, heavy duty powder coat finishes and Soft Touch protective rubberized grip will withstand years of use and abuse.

HOCKEY STICK HOOKS

CUSTOM HOOKS FROM STOREWALL CANADA

New Product from StoreWALL Canada. As Canadians, hockey is ingrained in our DNA. Unfortunately, storing hockey sticks is not always the easiest of tasks. They are constantly falling over or sliding out. StoreWALL has developed a simple and effective solution. Choose from the following options: Single Stick, Double Stick, Four Stick and Six Stick Holders. They will hold your sticks vertically and flat against the wall.
